Avilar Launches New Version of its WebMentor® Learning Management System

Blended Learning Management, Advance Reporting and User Interface Tailoring Highlight Version 6.0

Columbia, MD – September 19, 2007 – Avilar, Inc., a leading provider of learning management and competency management solutions, has released WebMentor Learning Management System (LMS) Version 6.0. The new version helps organizations better manage blended learning curricula and perform detailed analysis of course completion and training certification.

“The new WebMentor LMS 6.0 greatly improves the capability of our customers and partners to deliver and manage blended training,” notes John Skowlund, Avilar’s Chief Executive Officer. “The increased flexibility of the user interface allows customers to tailor the system to their specific needs and the enhanced reporting capabilities improve their ability to measure the ROI of training.”

The new version of WebMentor LMS improves management of e-learning and instructor-led training. Instructors can schedule classroom events, track attendance and post assignments and course documents on-line. Learners can download assignments and documents and upload completed assignment to the instructor. Learning curricula can support blended learning with events from e-learning, classroom training and independent assignments. Version 6.0 also features improved certificate management allowing administrators to generate, manage and reprint certificates for e-learning and instructor-led training.

With the advanced reporting system in WebMentor LMS Version 6.0, administrators have an improved ability to monitor and report training completion. Reports have drill down and sorting capabilities for improved analysis and reports can be exported in PDF and Excel formats. Avilar has also extended the ability to integrate WebMentor LMS with other Human Resource Information Systems with the support of web services for such tasks as learner enrollment and course registration.

“The enhancements in WebMentor LMS 6.0 were driven primarily by customer feedback,” said Mr. Skowlund. “It is important that we continue to expand our learning

technology to better help our customers in developing their employees to meet their organizational goals.”

About Avilar Technologies

Avilar Technologies, The Competency Company™, provides web-based competency management and learning solutions for the corporate, government and academic sectors. With its Smart, Strategic and Proactive solutions, Avilar offers a competency-based approach to workforce development. Formed in 1997, Avilar was a pioneer in the e-Learning marketplace. The flagship WebMentor® product line, originally introduced in 1998, includes a complete suite of affordable, easy-to-use, and full-featured competency development and management tools. WebMentor LMS and WebMentor Skills are available as an on-demand solution (SaaS) as well as an installable software solution. Avilar is the recipient of the Excellence in E-Learning for Customer Satisfaction award from Brandon Hall and E-Learning Magazine, and was cited by Training Magazine as a top “Price-to-Value” provider.
